Re: Custom Tire and Recycle-IDL 03-0212  
Minor Modification Approval

Dear Mr. Pefanis:

This letter is in response to a minor modification request submitted on your behalf by Mr. Jo House with Civil and Environmental Consultants on October 19, 2009. The proposed modification requested approval to accept secondary aluminum smelter wastes for disposal at this facility. The modification request provides specific guidelines for managing the disposal of these wastes in the revised operations manual for the facility.

The minor modification request dated October 19, 2009 is hereby approved provided the following conditions are met:

1. All secondary aluminum smelter wastes shall be managed as special waste in accordance with Rule 1200-1-7-.01(4) of the "Rules Governing Solid Waste Processing and Disposal in Tennessee," and all applicable Division of Solid Waste Management policies.
2. Secondary aluminum smelter wastes approved for disposal shall only be managed in landfill cells designed and constructed in accordance with design criteria in the facility operations manual that meet the leachate migration control standards specified in Rule 1200-1-.04 (4) of the "Rules Governing Solid Waste Processing and Disposal in Tennessee."

Please be aware that any agreements or contracts between your facility and any local governmental agency or entity are not affected by this minor modification approval.
